

wherein a cross-sectional area of the cavity is gradually narrowed in a direction of the  
another end of the cavity such that the finger of the wearer that is inserted can be stopped ~~mini-sheet~~  
~~piece is bonded at each lateral side of the interlabial pad.~~

Claims 2-5 (canceled).

Claim 6 (currently amended): The interlabial pad according to claim 1, wherein an interval dimension ~~[[of]]~~ between the opening for finger insertion and said finger restriction portion is 10% to 80% of a length in the longitudinal direction of the opposite face.

Claim 7 (currently amended): The interlabial pad according to claim 1, further comprising a front end,

wherein the cavity opening is disposed at a location that is 40% from the front end of the interlabial pad, and

wherein said finger restriction portion is disposed at a location that is 90% ~~[[form]]~~ from the front end of the interlabial pad.

Claim 8 (withdrawn): The interlabial pad of claim 1, wherein said finger insertion restriction portion comprises a fingertip exit for protruding the nail tip of the inserted finger.

Claim 9 (currently amended): The interlabial pad according to claim 1, wherein said finger restriction portion is disposed at a predetermined distance from one longitudinal end towards the center ~~[[or]]~~ of the interlabial pad on the opposite face.

Claim 10 (withdrawn): The interlabial pad of claim 1, wherein said finger insertion cavity comprises a finger insertion compulsory portion for tilting compulsorily the finger insertion direction toward said finger insertion restriction portion on the opposite side face to body.

Claim 11 (withdrawn): The interlabial pad of claim 10, wherein said finger insertion compulsory portion is formed by a shape of folding said mini sheet piece into said finger insertion cavity.

Claim 12 (previously presented): The interlabial pad according to claim 1, wherein the interlabial pad is used together with a sanitary napkin.

Claim 13 (previously presented): The interlabial pad according to claim 1, wherein said interlabial pad is for incontinence.

Claim 14 (previously presented): The interlabial pad according to claim 1, wherein said interlabial pad is for absorbing vaginal discharge.

Claim 15 (withdrawn): A wrapping body comprising an interlabial pad; and  
a wrapping container containing said interlabial pad, wherein said interlabial pad is  
contained and folded such that said finger insertion opening opens when said wrapping container is  
unwrapped.

Claim 16 (withdrawn): The wrapping body of claim 15, wherein said wrapping container  
comprises a mark indicating an unwrapping direction which is the same direction as an insertion  
direction of the finger into said finger insertion opening.

Claim 17 (withdrawn): The wrapping body of claim 16, wherein said mini sheet piece in  
said interlabial pad is folded outwardly in a shape swelling toward the body side.

Claim 18 (previously presented): The interlabial pad according to claim 1, wherein a length  
of the mini sheet piece is between 50% and 80% of a longitudinal length of the interlabial pad.

Claim 19 (withdrawn): The interlabial pad according to claim 1,  
wherein the interlabial pad is formed with adhesion on a part of the face adapted to face a  
body to be in contact with a genital area of the body.

Claim 20 (withdrawn): The interlabial pad according to claim 1,  
wherein the mini-sheet is formed as a water permeable sheet.

Claim 21 (new): The interlabial pad according to claim 1,

wherein the mini-sheet is attached so as to be in direct contact with the opposite face except for a portion of the cavity, and the mini-sheet is arranged at a side of the cavity, being opposite to the cavity opening.

Claim 22 (new): The interlabial pad according to claim 1,

wherein the mini-sheet is bonded to the opposite face at the lateral sides and at the side of the another end of the cavity.

Claim 23 (new): The interlabial pad according to claim 22, further comprising:

a first portion for bonding the opposite face to the face adapted to face the body; and

a second portion for bonding the mini-sheet to the opposite face,

wherein the first portion and the second portion are offset.
